HARSHVARDHAN
CHANDRAVANSHI
FULL STACK DEVELOPER

OBJECTIVE

I am a Full Stack Developer with a strong background in Java and Spring Boot. I have a passion for building scalable web applications and have experience in both backend and frontend development. My work focuses on creating efficient, high- quality solutions that meet industry standards. I'm eager to apply my skills in a dynamic environment and contribute to impactful projects.

EXPERIENCE

JAVA DEVELOPER INTERN (HULKHIRE TECH)

Jul 2024 - Aug 2024

Remote position focusing on Java development for Stripe Payment Integration for toycuddle.com using Spring Boot.

FULL STACK DEVELOPER INTERN (AMSTECH INCORPORATION PRIVATE LIMITED)

Aug 2023 - Feb 2024

Conducted Extensive POCs on JAVA FULL STACK. Done tasks like Database design, HTML/CSS pages, JSP creation, servlets and work in J2EE environment.

PROJECTS

Job-application
- Build a production-grade **microservices** application using Spring Boot, Docker, and Kubernetes.
- Created **RESTful** APIs with inter-service communication via **Eureka**, **RabbitMQ** and load balancing.
- Containerized services with **Docker** and orchestrated them on **Kubernetes** for scalability and resilience.
- Integrated monitoring with Spring Boot Actuator and enabled **distributed tracing** with **Zipkin**.

Stripe Payment Integration - One-Time Payment
- Developed a payment processing microservice using Spring Boot for one-time payments via Stripe
- Used **MVC** and domain-driven design for structured code and business logic.
- Ensured secure communication and compliance with PCI DSS standards by using **Stripe's webhooks** and secure keys.
- Build a **reconciliation** logic to schedule payment status and expire payment at stripe end and update final status.
- Implemented Custom **Exception handling** with proper custom status codes from each microservice.
- Deployed on **AWS EC2** instance with the help of **MobaXterm** command-line
